Table of Contents

Module 1: Module 1: Concepts of Intellectual Property

- 1.1 What is Copyright?
- 1.2 Ideas vs. Expression

Module 2: Module 2: Fair Use Doctrine

- 2.1 The Four Factors of Fair Use

Module 1: Concepts of Intellectual Property

1.1 What is Copyright?

LESSON OBJECTIVES

- Understand the core concepts of 1.1 What is Copyright?
- Learn the best practices of 1.1 What is Copyright?
- Apply 1.1 What is Copyright? in real-world scenarios

Copyright is a form of intellectual property law that protects original works of authorship, including literary, dramatic, musical, and artistic works. It grants creators exclusive rights to reproduce, distribute, perform, and adapt their work. Protection begins automatically the moment the work is fixed in a tangible medium of expression.

1.2 Ideas vs. Expression

LESSON OBJECTIVES

- Understand the core concepts of 1.2 Ideas vs. Expression
- Learn the best practices of 1.2 Ideas vs. Expression
- Apply 1.2 Ideas vs. Expression in real-world scenarios

A fundamental principle of copyright law is that copyright protects the expression of an idea, not the idea itself. For example, you cannot copyright the idea of a wizard school, but you can copyright the specific characters, dialogue, and text of a book written about a wizard school.

Module 2: Fair Use Doctrine

2.1 The Four Factors of Fair Use

LESSON OBJECTIVES

- Understand the core concepts of 2.1 The Four Factors of Fair Use
- Learn the best practices of 2.1 The Four Factors of Fair Use
- Apply 2.1 The Four Factors of Fair Use in real-world scenarios

Fair use allows limited use of copyrighted material without permission for purposes like criticism, comment, news reporting, teaching, or research. The four factors are:

1. Purpose and character of the use (transformative vs. commercial).
2. Nature of the copyrighted work.
3. Amount and substantiality of the portion used.
4. Effect of the use upon the potential market value.
